NITESH KUMAR

LinkedIn | knitesh1123@gmail.com | GitHub | +91-7876413487

Skills

Languages: Python, JavaScript, TypeScript, SQL, Java
Web & Backend: HTML/CSS, React.js, Node.js, Express.js, FastAPI, Socket.IO, Kafka
Databases: PostgreSQL, MySQL, MongoDB, Redis
Tools & Cloud: Git, Docker, Prisma ORM, LangChain, Power BI
Soft Skills: Problem-Solving, Teamwork, Time Management

Projects

SwiftChat – Real-Time Chat Application | GitHub | Live Demo *Aug 2026 – Sept2026*

- Architected a **real-time chat system** using **3 microservices** (API, Socket, Consumer) to enhance scalability and modularity.
- Reduced message delivery latency by **∼70%** using **Socket.IO + Redis Pub/Sub** for instant real-time communication and presence tracking.
- Built an event-driven pipeline with **Apache Kafka** handling **1000+ messages/min** throughput, ensuring reliable and zero-loss message processing.
- Improved system performance by **∼60%** by decoupling database writes via **Kafka** and asynchronous consumer processing with **Prisma ORM**.

Tech Stack: Express.js, TypeScript, React.js, Socket.IO, Kafka, Redis Pub/Sub, PostgreSQL

EquityBot – AI Research Assistant | GitHub | Live Demo *Aug 1 – Aug 20, 2026*

- Built a **research-automation tool** that answers company- and sector-specific queries with cited sources, cutting the manual effort of secondary industry research.
- Designed an end-to-end **data pipeline** (LangChain + FAISS) for document ingestion, indexing, and semantic search over financial news, converting unstructured web content into a searchable, queryable knowledge base.
- Developed the **ingestion layer** to pull and parse articles directly from financial-news URLs/APIs, keeping the research base current with minimal manual effort.

Tech Stack: Python, LangChain, Google Gemini, FAISS, Streamlit

Retail Sales Analytics – End-to-End Pipeline & BI Dashboard | GitHub *Jul 2026 – Jul 2026*

- Built an end-to-end **ETL and analytics pipeline** on a **9,994-row** retail orders dataset—cleaning raw data, engineering discount, sale-price, and profit features, and **modelling and loading** a structured **SQL Server** table via Python/Pandas.
- Wrote **9 T-SQL queries** using **CTEs**, `ROW_NUMBER()` **window functions**, and conditional aggregation to answer revenue, profitability, regional, and year-over-year business questions.
- Delivered executive-ready **Power BI dashboards** that translate sales, profitability, and customer trends into **visualizations for non-technical stakeholders**, supporting business decision-making.

Tech Stack: SQL (T-SQL), Python, Power BI, DAX

Training

Training in Machine Learning – CipherSchools | Certificate *Jun 2025 – Jul 2025*

- Completed a **6-week** structured training covering data science workflow, Python (Pandas, NumPy), data visualization (Matplotlib, Seaborn, Plotly), and Power BI.
- Applied data preprocessing, statistical analysis, and machine learning techniques (**Regression**, **Decision Trees**, **Random Forest**, **SVM**, **K-Means**, **PCA**).
- Built projects including a chatbot (**NLP**) and an image classifier (**CNN**).

Certifications

NPTEL – Social Networks — Certificate *Jul 2025 – Nov 2025*
Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate — Certificate *Aug 2025 – Sep 2025*
Gen AI NASSCOM Certification – SFJ Skill Development Program — Certificate *Feb 2025*

Achievements

- Solved **100+ problems** on LeetCode, HackerRank, and GeeksforGeeks.
- Earned a **4-star rating** in Java on HackerRank.

Education

Lovely Professional University — B.Tech CSE; CGPA: 8.19 *Aug 2023 – Present*

Doon Valley Public School, Nalagarh, Himachal Pradesh — Intermediate; Percentage: 83.6% *Apr 2022 – Mar 2023*

Doon Valley Public School, Nalagarh, Himachal Pradesh — Matriculation; Percentage: 78.6% *Apr 2020 – Mar 2021*
